# XCITE®

## GREAT DESIGN, OUTSTANDING COMFORT

XCITE is an innovating , patented mattress, introduced in 2019 and won a "Best of the Best'Intersum Award"

### ZONED VENTILATION

'Zoned ventilation' is a breakthrough in terms of ventilation and comfort, The alternation of ventilation and comfort zones ensures a perfectly fresh and ventilated mattress fabric without losing softness or comfort.

In 2021 we have developed a next generation Xcite. On demand of the customers, we integrated the missing piece of the puzzle and developed a version with stretch. Which makes it easier for you to process and more user-friendly for the end-consumer.

It doesn't compromise on the breathability and gives an optimal balance between look and properties.

# SEAQUAL™

We turn the plastics collected from the sea into high quality, sustainable polyester fibers.

When you get on board with Seaqual™, you get on board with 1500 fishermen who bring the garbage they fish ashore. 400 boats retrieve 1 ton of trash daily and 100% of this garbage gets recycled. Some may say it's a drop in the ocean, but we're on it. Because we care about the future of our planet.

To maximise the impact, we need your help. Join the Seaqual™ community and dream of change as you sleep on the Seaqual™ mattress.

## **Latex:**

People who are used to the memory foam touch (a slow response) will be surprised to know that most latex is highly responsive, meaning that although it will react to the body, it has a natural bounce. Some sleepers prefer this, though others not so much.

Pros: High response, various options for the firmness.

MICRO COIL

GEL MEMORY FOAM

### Importance Of Cooling Down

Temperature plays a key part in the process of falling asleep. The temperature of our body will drop before we can start to doze off. So in order to quickly fall asleep, we need to find out that temperature.

### Memory Foam

Pros: Perfectly release your body weight and pressure.

### Micro coil

Since they are much smaller than the regular pocket spring, it's much more units to support your body. Each individual micro coil flexes gently in response to body movements without disturbing the other.

## RECYCLED

Recycled yarn,environmental dyestuff.Color is rich and pure,simple and fashion with softly hand feel.Suitable for different types of modern home furnishing.

## SLEEMON ENVIRONMENT ECO-FRIENDLY

We hope that one day, our new products can be fully made of recycled materials.

We believe in "PUSH TO CHANGE".

SLEEP DEEP & WELL

# Brand conception

The spiritual core of “keeping gratitude and working together” is ineradicable culture and value. We’re grateful to nature for raw materials for making mattresses; We’re grateful to global scientists for their achievements for sleep quality improvement; We’re grateful to consumers for taking as their first and lifelong bedding brand; We’re also grateful to all staff for their contributions to the brand and customers. This is what we abide by and how we treat people and things, which will be rooted in all measures to be taken.

# Sustainable development

Adhering to the principles of sustainable development, seeks for better sleep for everyone and highlights the integration of ecological consciousness and social responsibility. Not only does it benefit more customers through product prices, quality and services, but it also shoulders the social responsibility, which is worthy of pride.

To this end, researches on sophisticated sleep technologies have been actively carried out. Thus, we become the first company in the world that applies the supercritical extraction technology and the state-of-the-art formaldehyde purification technology to the mattress field, lays emphasis on the ecological consciousness in business development, as well as the prudent attitude towards products and services, in an efficient, natural manner, free from chemical pollution. That is why we define sustainable development as tying market success in ecological consciousness and social responsibility.

# Brand value

## *Integrity*

From production to service, always sincere and sincere. Modern natural aesthetic design, natural materials and materials are the same.

## *Informatization*

In depth study of human sleep index. The full digital guidance from R & D to the market will connect with the world at all times.

## *Progress together and win-win*

Closely linked with the market and society, sleep on keeps pace with the world at all times. The spirit of gratitude is deeply rooted in the corporate gene to achieve a win-win situation of market efficiency and social responsibility.

## *Responsibility*

we are committed to the quality of human sleep and ensure the overall high quality from production to service.

## *Innovation*

continuous creativity, foresight and meaning coexist.

## *Well-Sleep to the world*

one third of life will be spent in sleep. Sleeping every night is the decisive factor for human progress. We focus on human healthy sleep and bring deep and good sleep to the world.

# Worldwide media partner

Design Diffusion is an online magazine spreading design news and culture in Italy and all over the world (70%users read in English).

Design Diffusion World editorial system includes 11 paper magazines, the most famous of which is Design Diffusion News, since 1990.

Designdiffusion.com is a link between the worlds of paper magazines and websites, maintaining an independent profile with original contents, direct links to DDN blog, social media channels and DDN video news. The result of the constant interaction between these entities is a complete news coverage and a useful service indispensable to people working in the concerned fields.

## MALAYSIA/MALACCA

# PROJECTS ARCHITECTS WE MET

## NOMAPS

di Luisa Castiglioni  
foto di H.Lin Ho

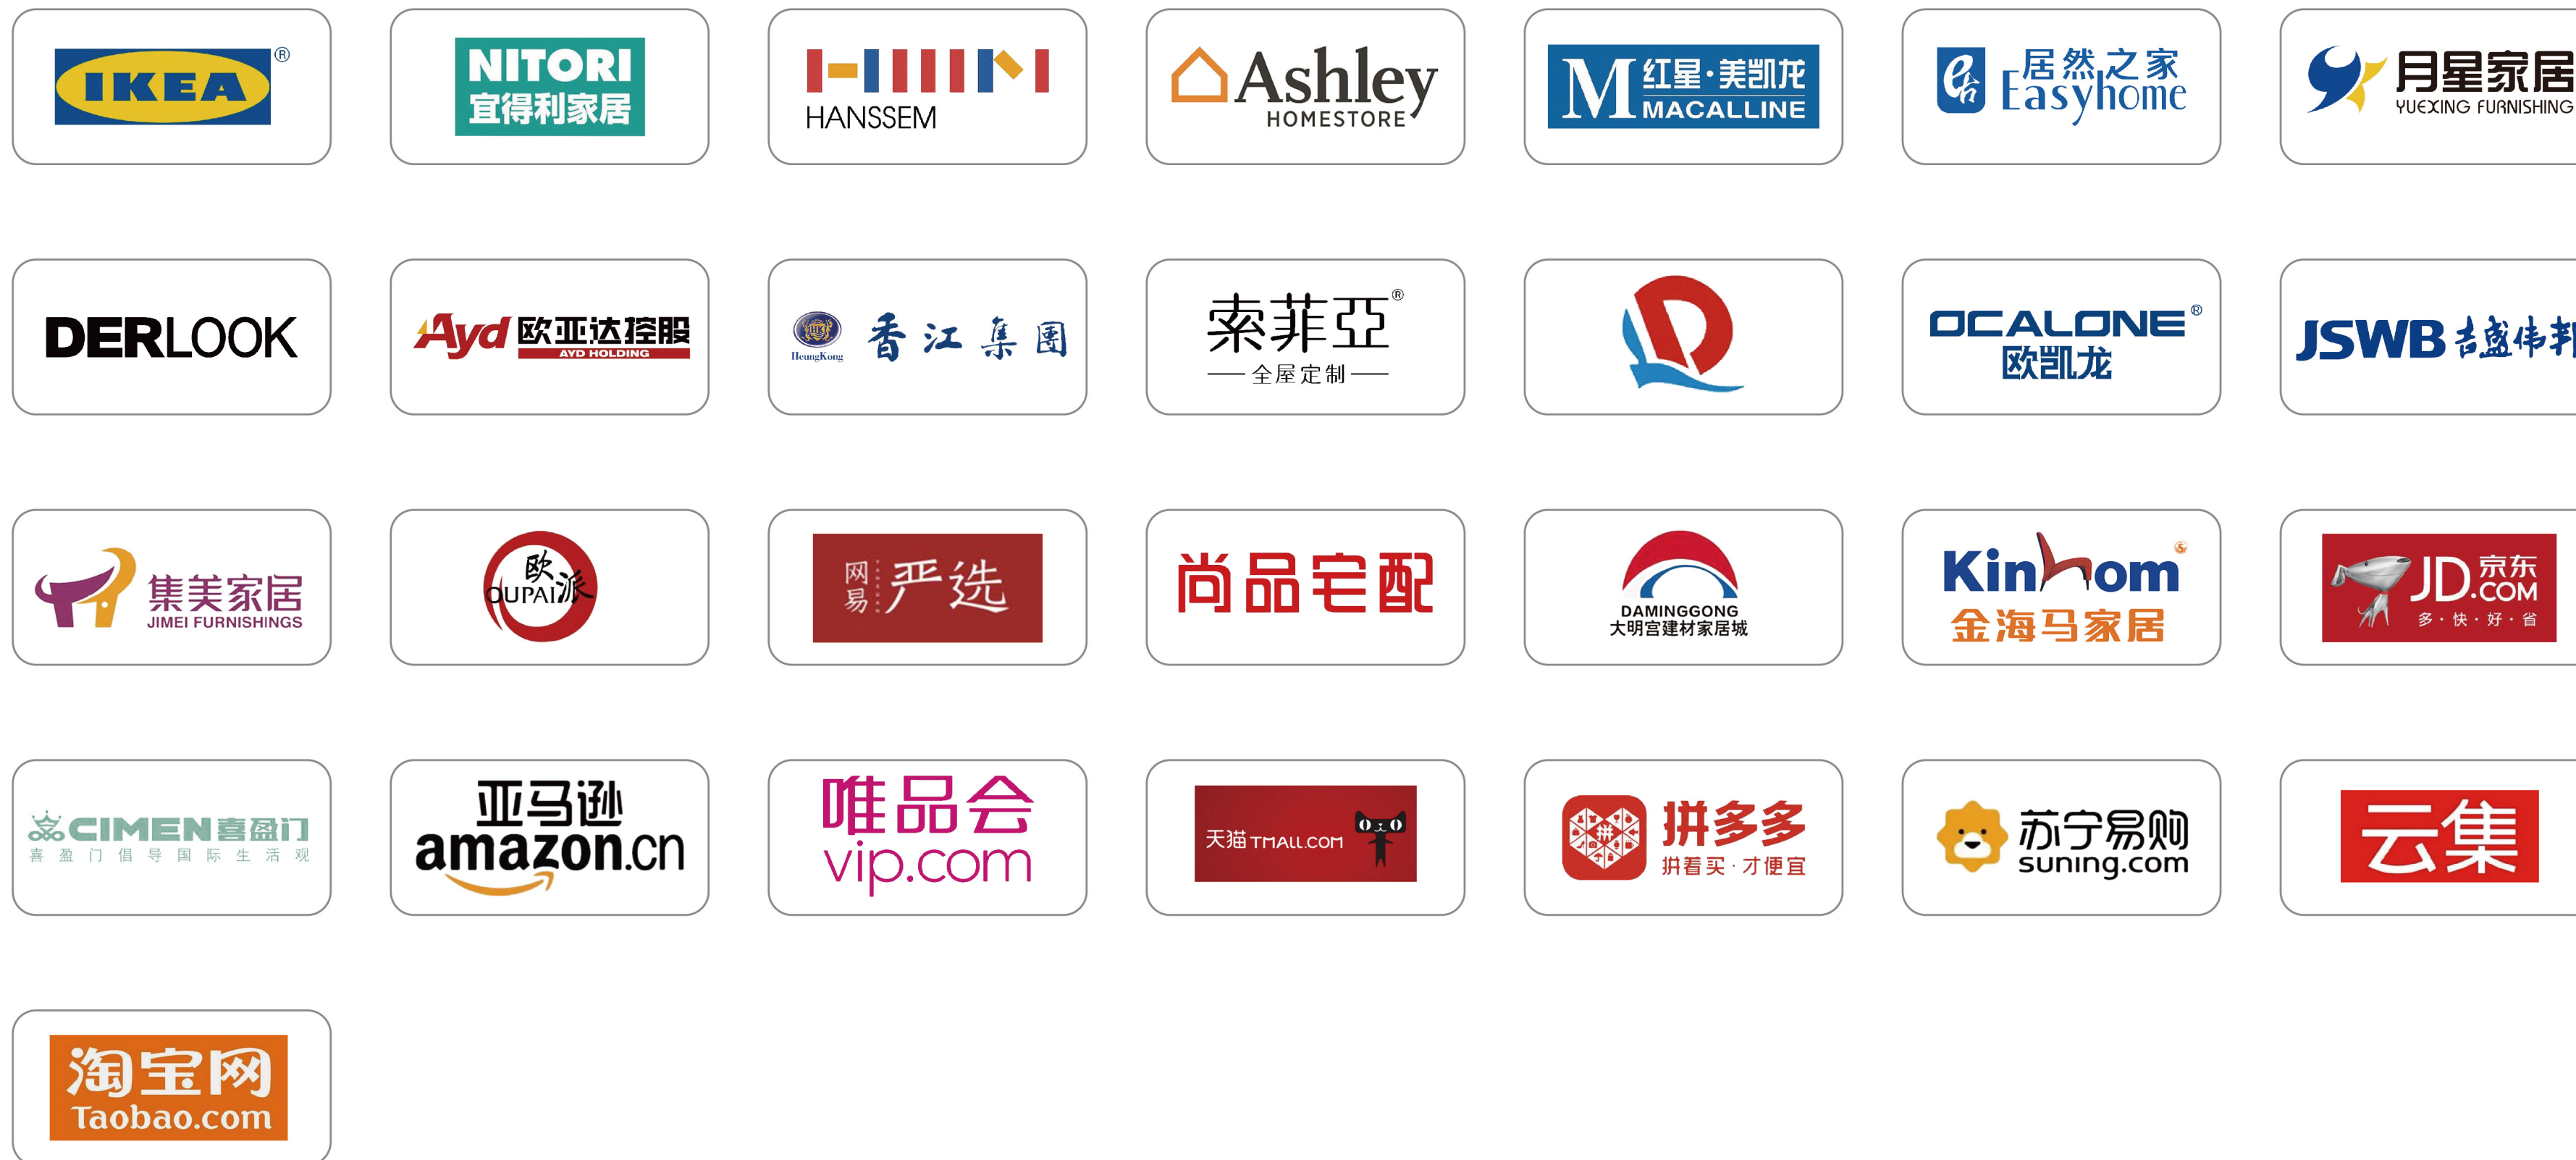

Situato nel cuore di Malacca, patrimonio dell'umanità dell'UNESCO, Nomaps è un ostello leggero e arioso, divertente e vivace. Progetto di DRTAN LM Architect (in collaborazione con SLT Architects).

Situated in the heart of Malacca, a UNESCO World Heritage Site, Nomaps is a light and airy, fun and lively hostel. Project by DRTAN LM Architect (in collaboration with SLT Architects).

Lo studio DRTAN LM dell'architetto Tan Loke Mun, pioniere del movimento moderno tropicale (ModTrop) che mette l'accento sulla comunità e sulla cultura attraverso progetti innovativi e sostenibili, ha dato vita a un luogo speciale in equilibrio tra eredità senza tempo e design contemporaneo. Per l'ostello Nomaps, sito in un vecchio negozio a due piani, si è cercato di preservare il carattere dell'edificio esistente, meravigliosamente conservato: la trasformazione non è una semplice operazione superficiale per ripristinare l'antico, ma base per la creazione di una nuova identità spaziale facilmente riconoscibile. Il team di progetto, composto da Tan Loke Mun, Tiong Kian Boon, Alvin Tham Yee Weng, Tan Yen Xie, ha coordinato il design di tutti gli elementi interni, compresi mobili, lampadari, opere d'arte. Con un modesto budget

i materiali esistenti sono stati riutilizzati per rinnovare gli interni preservando i valori fondamentali dell'edificio. Gli elementi chiave del progetto sono così il bancone della reception in calcestruzzo, accostato al vecchio pozzo d'acqua della lobby, gli arredi di recupero – come le lampade d'epoca pendenti e il grande tavolo a cavalletto realizzato con il legno ricavato dal vecchio pavimento – e le opere d'arte e design che popolano ambienti comuni e camere. La copertura dell'edificio è ricostruita con i profili in terracotta e tegole originali utilizzate nelle case del XVIII secolo. Le pareti sono state conservate nella loro forma originale con gli antichi strati di intonaco e patina a vista, dove ogni strato rappresenta un pezzo di storia. dtlm.com.my

# Import Brand

Brand Profile:

With superior quality, elegant and classic original style, mellow Italian design style and advanced manufacturing process.

we provide customers with high-quality Italian home life.

# Import Brand series

## Brand Profile:

The design takes the western classical sculpture aesthetics as the cultural background and source, inherits the traditional exquisite craftsmanship, and shows the noble and elegant temperament of European nobility from the fine carving.

Perfect combination of texture, so that each product is permeated with noble and elegant beauty, adding more artistic flavor to home life.

# Advanced Technology Makes Deep sleep More Healthy Care

The world's first adjustable hardness and softness  
intelligent mattress

International invention patent "air spring technology" subvert more  
than 200 years of steel wire spring technology,9 years of research and  
development, a total of 107 patents, creating the first domestic single  
mattress patents.

## Advanced Technology Makes Deep sleep More Healthy Care

Dual-core technology anti-bacterial and anti-mite

Cooperate with DuPont® and Swiss Sanitized® to develop anti-bacterial and anti-mite technology.

Achieve the highest level of anti-bacterial effect of mattress in the world . The antibacterial rate is as high as 99.9999%.
