2023

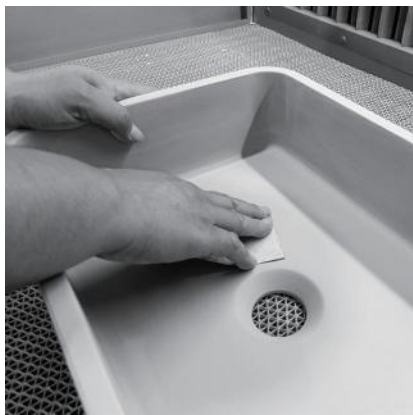

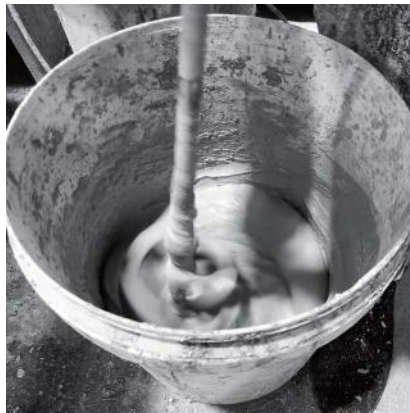

# Process Equipment

# Production Process

# Color is the most difficult to control in all processes

Each piece is unique and will feature light air bubbles and subtle color difference, such is the nature of the material.

When it comes to color, concrete gives you the ultimate freedom and flexibility because it can be cast in just about any color imaginable.

Keep updating the colors...

## SANI

Concrete Products

Concrete basin is unique and artistic. Solid and practical; High strength; High toughness; No ash on the surface; The surface is glossy; Long term soaking in water will not penetrate or crack, and it's easy to take care of.

Concrete has a unique appearance and endless creative possibilities, which can shape soft and beautiful curves and warm and soothing colors. It gives people a natural appearance and feeling, and can be well integrated with other design styles.

SUF-1002 

 | **YD**  
Grit Yellow

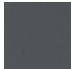

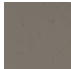

Based on the properties of concrete, its combination with the proportion of small grains of sand and gravel not only ensures the excellent characteristics of concrete furniture, but also increases the different surface texture and texture, presenting a more diverse style.

YD uses light yellow as the background color and yellow green irregular dots as the embellishment, presenting a warm and detailed effect.
