# ABOUT US

Jiangsu Canasin Textile Technology Co., Ltd. is a leading comprehensive hotel linen manufacturer in the Asia-Pacific region. As the drafting unit of national standard of hotel linen industry, Canasin was also honored and trusted with the responsibility of leading the national linen standard formulation for China and global region. So far Canasin has lead and participated in the formulation and revision of standards of international, national and industrial level in a total of 26 projects, which has much improved the industry standard and reassured hotel linen procurement processes.

With 30 years of development, Canasin has completed the full production chain covering bathroom linen, guestroom linen and F&B linen and finished the vertical integration of the production process, realizing the full control from research and development to terminal sales to minimize the procurement risk of the hotels.

With product and services recognized, Canasin served more than 3000 leading hotels to-date for more than 100 hotel groups, sales net work covering the entire China and globally over 60 countries, with approval by many hotel brands, such as IHG, Marriott, Hilton , Accor, Hyatt, Jingling, Shangri-la etc.

## 200,000

Production base more than 200,000 square meters

## 1,600

Full time employees more than 1,600

Advanced equipment including SMIT weaving machine, product-o-rial system, automatic storage & retrieval system etc.

Self-developed machines including automatic cutting machines and hemming machines etc.

## 300,000

With annual capacity for towels 4,000tons, bed linen 2million sets, duvet 400,000pcs, bathrobe 800,000pcs, slippers 10million pairs, which can meet the needs of 300,000 hotel rooms

### Prospective R&D center

Keep studying on hotel needs, working out new product like anti-hooking bathrobe, non-slip and wear resistant bathmat, flame retardant linen, etc, to help hotels to upgrade guests' room experience.

### CNAS-National recognized testing center

CNAS (China National Accreditation Service for Conformity Assessment) , is currently the only institution in China that is authorized and approved by CNCA (Certification and Accreditation Administration of the People's Republic of China) .The testing center of Canasin owned the national level management ability and testing capability of international level, which has been officially approved by CNAS in 2023, and achieved mutual recognition of testing results in the international scope.

### Linen Experience Officer

Linen experience officers invited from the entire China region to help Canasin realize the true feedback of product use experience, continuously optimize and innovate, to ensure products can truly meet the market demand and solve customer problems.

## INNOVATIVE R&D

#### Raw material quality control

With national-level professional testing qualifications, we conducted over 30,000 sample testing on raw material and finished products to ensure the quality.

#### Production process quality control

More than 40 testing procedures are set up in the production process, and the production process is fully controlled.

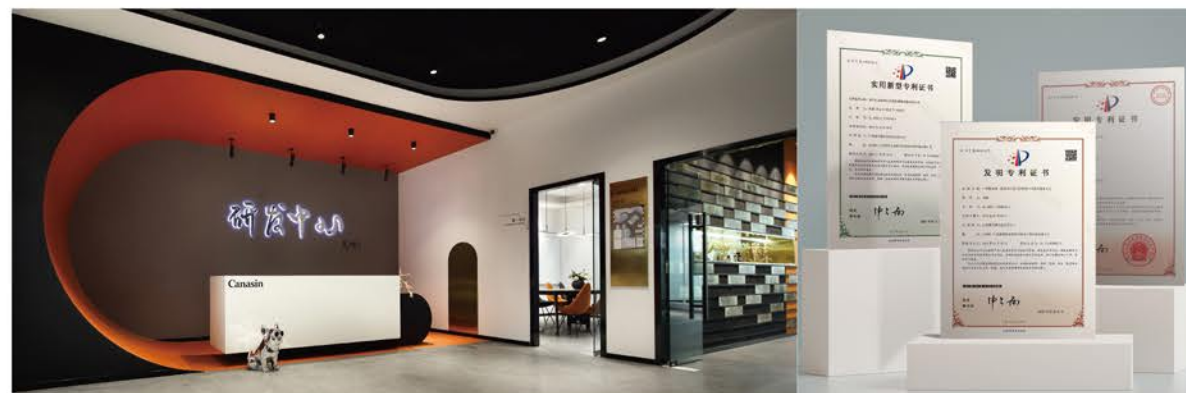

#### Finished products quality control

Equipped with over 60 sets of professional testing equipment, Canasin lab is able to test various items for linen products, against national standard for the strict control of the quality of finished products.

#### System management

Comprehensive and rigorous management system , with ISO9001, ISO14001 and other professional system certifications.

# TENCEL

## Natural and Environmental

Making of natural wood pulp fiber, through the organic solvent (NNMO) spinning process, which completed under physical action, and the entire manufacturing process is non-toxic and non-polluting.

## Silky Texture

Canasin Tencel fabric have the characteristics of soft drape, unique touch, elegant and dynamic, breathable and moisture-permeable, and enjoy the graceful touch of the skin. It is the first choice for many five-star hotel presidential suits and state guesthouse.

## Breathable Fabric

Tencel has a good humidity management function, with much better moisture absorption and desorption properties than cotton fabric. It is more comfortable and softer, well known as "Breathable fabric".

## SUPERIOR T600

Selected high-quality long-staple cotton, the precision structure of high thread and high density makes the fabric silky and smooth.

BEDDING

JACQUARD NEW ARRIVALS

## PEAKS

Inspired with the shape of mountain peaks on highland, the Peaks fabric is made with high thread count and high density, jacquard design with simple smooth lines to present the rhythm of nature.

## BLENDING

The unique partial jacquard design with a clear sense of hierarchy. The special pattern design looks with 3D effect which can replace the bed cover.

## HALO

60S exquisite jacquard, woven with yarn to create a three-dimensional effect, with a sense of visual depth, exclusive organizational design, making it simple and stylish.

## LIGHT OF FIVE-ELEMENT

60s satin jacquard, soft and delicate. The use of classic strips combined with the Chinese traditional five-character form has a beautiful meaning and a flowing visual beauty.

## NATURAL COTTON

The design concept returns to nature, ecology and environmental protection. Using ecological scouring process, no pollution, naturally showing the primary color of cotton fiber. No fluorescent whitening agent is added to preserve the natural color of the fabric for more health.

## COLORED WASHABLE SERIES

Emphasize "theme" and "personalization" to bring more style and color into the room. Ecological dyeing process, extracting mineral pigments, resistant to chlorine bleaching, and longer-lasting color fixing effect. The colored washable bed linen can adapt to the hotel washing environment while ensuring comfort.

	<b>SHUMAN</b>	Yarn: 60S*60S/T250 Color: Glacial ash
	<b>MOYING</b>	Yarn: 60S*40S/T300 Color: Darkness
	<b>HUIPU</b>	Yarn: 60S*60S/T300 Color: Light gray

## DECORATIVE LINEN -COARSE LINEN SERIES

Coarse linen fabric is full with texture quality while soft hand feeling, which is simple and versatile, and various color available.

## SCARLETT

The combination of artistic flowers and simple strips reflects the natural leisure attitude and artistic beauty.

Note: Due to the influence of printing and production technology, there may be slight color deviation in colored products.

## GRS SERIES

The concept of sustainable development has penetrated into all aspects of the hotel, and green guest rooms have also been widely developed in the industry. Canasin has been committed to the research of the relationship between textiles and ecological sustainability, has successfully obtained GRS product certification.

GRS Series products all made with recycled fiber certified by GRS.

- Duvet
- Pillow
- Mattress topper

## WATER REPELLENT SERIES

Shell: 40S 100% Cotton down proof

Filling:  $\geq 50\%$  down

Through the special treatment of natural down to form a hydrophobic film, the water repellency level reaches the IDFB standard level 5, which can effectively keep down products dry, to avoid the decrease of bulkiness, microbial growth and related odor, health and other problems caused by humidity, maximize the thermal insulation performance of down, and prolong the service life of down products.

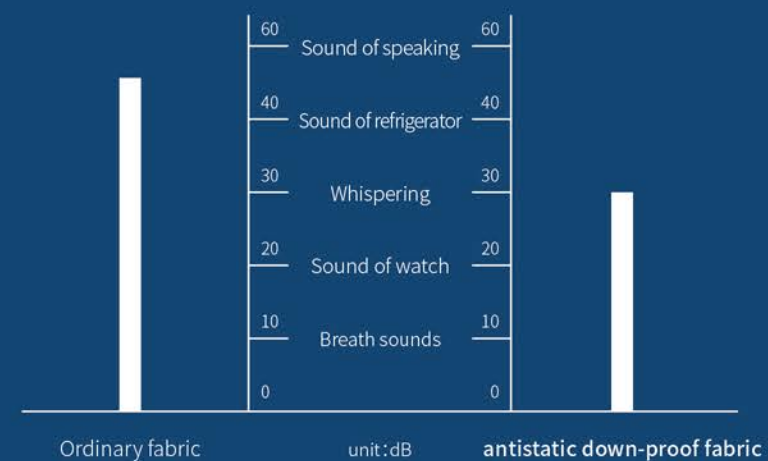

## NOISE-FREE SERIES

- Super soft down-proof fabric
- KJ antistatic down-proof fabric

Canasin Noise-free Series materials are woven with special ultra-fine fibers, with thickness only about a quarter of that of the hair. The fibers are smooth and long, which greatly reduces the tension of the surface of the fabric and effectively reduces the sound when it is rubbed and used. Meanwhile, with fine peaching treatment, and the fabric is much soft and skin-friendly, allowing you a peaceful sleep all night.

## G SERIES

Exclusive “Better Soft” Technology to redefine the softness of the towel. Ultra soft and fluffy, offering guests a wonderful experience of “Cloud-softness”.

Product	G6	G10
Face towel	35*35cm/70g	35*35cm/75g
Hand towel	75*40cm/180g	80*50cm/260g
Bath towel	150*80cm/800g	160*90cm/1000g

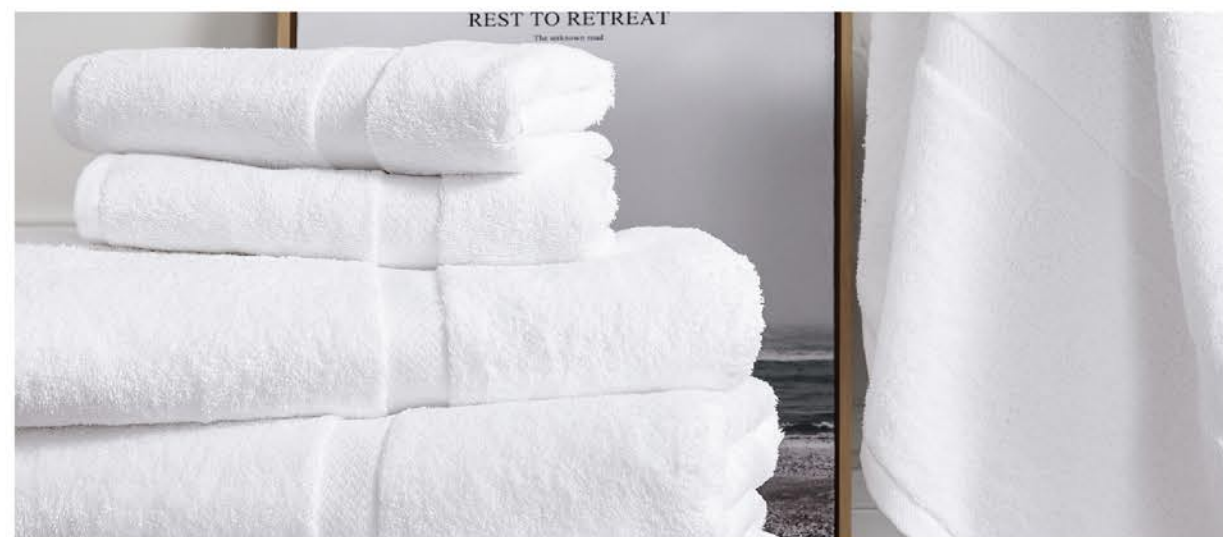

## STRIPED TERRY TOWELS WITH DOBBY BORDER

Face towel: 35×35cm/65g  
Hand towel: 75×40cm/160g  
Bath towel: 150×80cm/650g  
Bath mat: 80×50cm/320g

16S single loop with delicate dobby border, soft and plump, skin-friendly and absorbent, seeking a balance between the comfortable product experience and a suitable fabric weight. It incorporates the classic stripes into the towel design, to create a differentiated towel experience for hotels. The innovative header structure with ADM anti deformation technology, the edges of towels are not easy to wrinkle after washing, flat and beautiful.

# ADM SERIES

## PAC

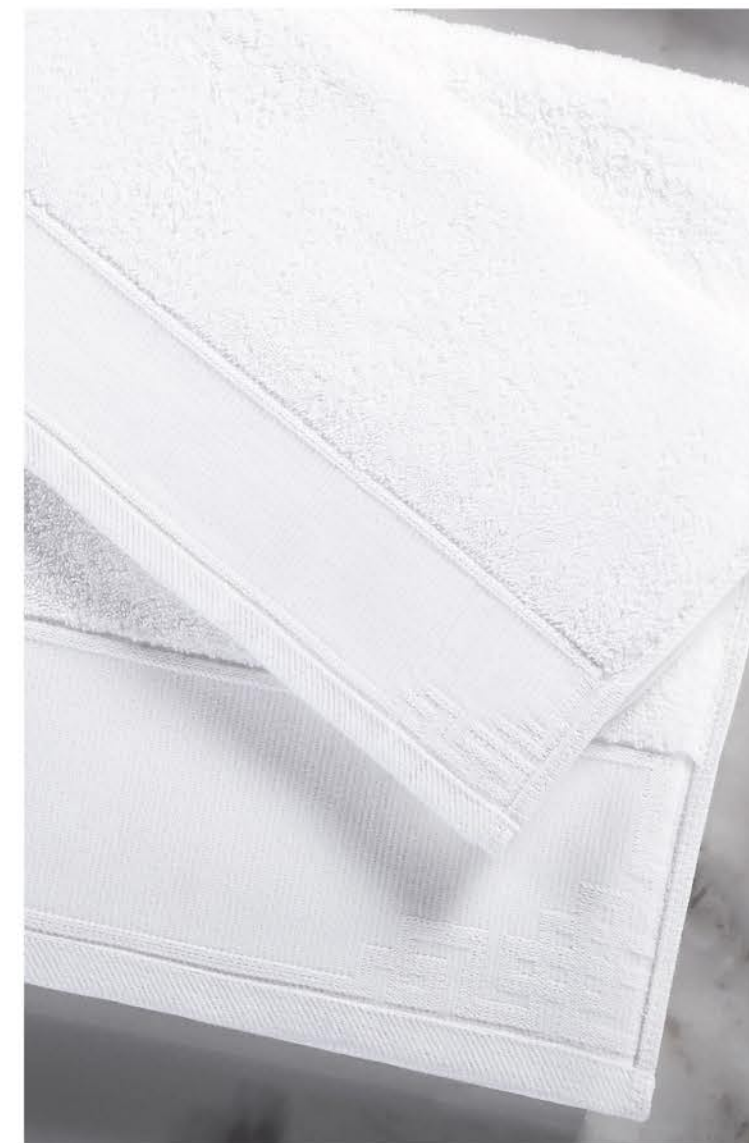

The PAC towel border/header improvement process is a patented technology of Canasin which can effectively improve the deformation, pilling, unevenness of towels which happens after washing. Meanwhile, by upgrading the weaving process, the skin-friendly properties have been improved to a new level.

\* Wash 20 times in the same environment

## SWR

SWR technology is designed for dobby header of towels, which can effectively enhance the strength of dobby header of towels, alleviate the washing damage on edges, effectively extend the service life of towels and reduce the operating cost of hotel.

REGULAR TOWEL

SWR TOWEL

\* Wash 190 times in the same environment

# ADM-D

ADM-D technology is specially designed to improve the wrinkling of towel plain hems, prolong the service life of the towels, and make the guestroom finishing more efficient.

Normally, the towels wear out after 120-150 times of washing. The photos above show that after continuous washing in laundry, normal towels (with dobby and plain border) wear out after 180 times of washing while the ADM-D Technology towel is not damaged even after 260 times of washing.

Regular style(180 washes)

ADM-D(180 washes)

ADM-D(180 washes)

\* Data sourced from professional laundry factories

The main reason of changing the useless towels is the border damage. With special design, the wear resistance of the ADM-D Technology towel borders is enhanced over 70%.

Regular towels	15374 times	↑ 73.46%
ADM-D	26667 times	

wear resistance
